Re: 115.388 Data Review

During the previous 12 months and since the last PREA Audit in April 24th, 2017 there has been no cases where sexual abuse and sexual harassment has occurred in the facility or another. Due to this, the agency has no data to collect. If there were data, it would be reviewed to assess and improve the effectiveness for its prevention, detection, and response policies, practices, and training. An annual report would be prepared which would include a comparison of the current year's data and corrective actions with those from prior years and shall provide an assessment of the agency's progress in addressing sexual abuse. The report would be presented to the Executive Director and PREA Coordinator and made available to the public through the agency website while providing a copy to the Department of Justice.
